Subject: Fwd: Filming at swifts

Good afternoon Charlotte,

I hope you had lovely Christmas and new years.

Our filming production is returning to Swifts Darling point for a week from tomorrow. I just wanted to reach out to you and let you know the extra measures we are taking to ensure we have a minimal impact on the community.

Tomorrow, we have extra people on the ground ensuring our production crew are only parking in our permitted spaces.

We have fewer permitted parking spaces directly in front of Swifts.

All additional trucks and vans have been directed to park at the domain car park in Woolloomooloo, after dropping off their equipment.

Our other permitted spaces are around the corner on Thornton Avenue. This will just be for our horses and carts and our camera truck.

I have attached my parking plan which shows the majority of our small trucks and vans are with the property and not in the street.

Our costume, make-up and wigs trucks and the cast green rooms will be parked in King's Cross. The cast and crew will be dropped at set by shuttle bus instead of parking on the streets. This has made a significant reduction in our footprint.

Our filming period for each day commences later in the day, so we won't have any loud trucks coming early in the morning.

I hope this demonstrates the commitment our production is making to have a smaller impact on the community during filming periods.

I will be on site for the entire week. Please feel free to share my contact details with any local residents.

I'm sorry we didn't get the opportunity to give you a tour of the set on our last visit. I'm Looking forward to doing that with you this week if we can find a time that works for both of us. Tuesday is our biggest day. We will have three sets of horses and carts in the driveway. that will be an exciting scene to witness if you have time.

Thanks Charlotte,
I'm sure I will see you very soon.

Kind Regards,
Nathaniel O'Brien
